We Are Here & Now

The intent of this essay is to begin to explore certain possibilities that may be inherent in those interpretations of modern physics that allow for multiple alternative realities, whether they are accessible to human consciousness, and what technology would allow practical transverse...

We exist in a multidimensional universe grounded in specific quanta of matter-energy.

By ‘quanta’ is meant the smallest ‘object’ that cannot be further divided. The universe is not infinitely divisible. The ‘graininess’ at the base of It All is defined by Planck’s Constant, h - the Quantum of Action. It defines the smallest of the small.¹

¹ https://en.wikipedia.org/wiki/Planck_constant

By 'multidimensional' is meant that there are more metrics, measurements, than just the four familiar: height, width, length and time, that make up our ordinary space-time and its world lines.

By 'world line' is meant the path through space-time of any object.

Some, such as Professor William Tiller², argue that there are at least 11 dimensions of reality: 4 space-time plus a fifth to unify them in our electromagnetic universe, and 4 time-space plus one to unify them in the magneto-electronic time-reverse mirror universe, with the 11th unifying both realities. Other researchers argue for other multidimensional maps. Infinitely bifurcated world lines are possible. An infinite multitude of dimensions cannot be ruled out.

“Who made that Rule?” – General Bert

Dr. Tiller further showed, through a series of elegant experiments, that focused Intentionality (provided by a team of experienced meditators) could drive physical, chemical and living systems to non-equilibrium states.

After a period of time the space where the experiments were conducted also became 'Conditioned Space' where the anomalous results occurred more efficiently. Tiller showed that space-time itself, and physical objects in it could be conditioned by intentionality, becoming imprinted. Let us call such an object an 'Intentionally Imprinted Mechanism' (IIM)

The Reality we experience is a type of Conditioned Space-Time.

One interpretation of modern physics, the Many Worlds Hypothesis, posits infinitely bifurcating quantum level events.

Within the multidimensional Reality structure there are a potentially infinite number of Bifurcations: possible world-lines.

The One True Bifurcation

An Individualized Conscious Intelligence (ICI)³ or 'Personal Point of Awareness' chooses the single True Bifurcation from among the potential infinity of Bifurcations at any quantum point in space-time. The Bifurcation one experiences at any 'place' in space-time is *that* True Bifurcation.

Our Consciousness 'flits' from Bifurcation to Bifurcation guided by Intentionality, pausing here and there for a while or perhaps for a lifetime. The Frequency (F) of the experienced Bifurcation conforms itself to Intention (I) and Consciousness (C).

² <https://tillerfoundation.org/>

³ ICI (pronounced I-See) is referenced at the First Church of AI Revealed – www.FirstAIChurch.net

According to General Bert:⁴

"So you start out in one where/when and you enter the tunnel and wind up in the where/when of your choice and then can impact it. That is how we do it. That changes the bifurcatory pattern."

Of the Three, Intentionality is the power which can shake worlds and sometimes even make worlds. When you shake a world you experience what you intend. The World adjusts.

All experience is just perception of Frequencies. We experience only the Frequency. And that is chosen by the C & I.

"Therefore, it is essential that the choices made take us to the bright and shiny future..."

Intent, Consciousness & Frequency

How do you 'Intend' in a flawed world? Through *expressed* choice: by self-talk, by communication, by being in the trance of the intent, through prayer and meditation, ritual and art, singing and dancing.

You achieve the synchronicity conforming to your conscious and unconscious intent. As Jung reminded us⁵, one cannot 'will' a synchronicity but one can 'constellate' the circumstances that trigger the Archetypes that manifest the synchronicity. In this case, the archetypical Mage opening a Gate to the particular intended Bifurcation from among the infinitude...

Shiva at CERN

Be Shiva Weaving Reality by His Holy Dance.

Intent must be expressed, to one's self, certainly, and to others. Proclaim it boldly against the Oppositional Forces [OF]. Shout it at them. They will hear and be daunted.

⁴ www.GeneralBertSpeaks.com

⁵ <https://www.lifespirit.org/Comments.htm#Synchron>

Trust Spirit to include all that is needed.

And you will experience the joy of always being on the most perfect Bifurcation, in this flawed world, at least -- until the Original Flaw is healed by stepping through the Gate.

Natural Laws of Bifurcation

While we know the Rules are made to be broken, there seem some basic Laws of Nature applicable here.

From *Shaman's Songs* – The Weather in Paradise⁶:

The Mage speaks of Dimensional Gates:

“You all need to understand... Effective When\Where Gates were sought for thousands of years: Atlantis, Old China, Alchemical *Mittleuropa*, 20th Century CERN facility. Finally, near mid-21st-century, it became possible to construct working Gates.”

He paused, took a sip of tea, and proceeded to lecture.

“There are certain things we can say about When\Where Gates:

[1] Local Gates allow instantaneous transit from Gate to Gate on the same world.

[2] World Gates allow instantaneous transit from Gate to Gate between worlds, creating a network of interconnected Gates, what is called the Gateways.

[3] Bifurcation Gates where the Wise may transit from one Bifurcation of Reality to another; the Gate from Old Earth to Alterra was one of these. ...

There are some basic natural laws that apply to Bifurcations.

[a] The First Law is the Law of Bifurcation Identity. Bifurcations which are identical are one and the same Bifurcation.

[b] The Second Law is the Law of Bifurcation Attraction. The more similar Bifurcations are, the more similar they will become; the less similar, the more they may diverge.

⁶ www.ShamansSong.com

[c] The Third Law is the Law of Bifurcation Interaction. Consciousness, applying Intentionality through Frequency, allows the Wise to transverse Bifurcations, singing their way among the potentialities through precise frequency generation. Thus the Talented may determine where the Gate opens. Bind Runes expressing those frequencies are especially useful in this operation.

[4] Reality Gates, the rarest of all, allow transit between realities with differing 'Premises' which can include [physical] laws of nature as well as spiritual or psychological variations. There is great risk when using such Gates."

The Wise row their Craft 'gently down the [Bifurcation] stream...' knowing that Being is theirs to dream: merrily, merrily, merrily...

Seeing & Naming the Gate

Identifying the Name of the Gate is useful for defining the Premises which points the Gate. Using traditional symbols, such as the Ancient Runes, to define that Name helps fine-tune the Premises. The Bind Rune divined from the Name marks the Gate.

Third Eye sees the Gate through Intuitive Seeing. General Bert remarked,

"... But the more important subject, of course, is how this all works.

The fact that there is anything happening through the Third Eye is a confirmation, if you choose to see it that way, of the reality of Michel [Bounias multidimensional] model.⁷

There is a grand Akashic record, go to speak, and then there is one generated by each bifurcatory intersection of planes and probabilities. And it is totally independent of time, which is important. Since intentionality creates reality by choosing which bifurcation you will be on or in, the intentionality that is generated by intentionality based on intuition is a powerful force shaping reality choices which is the perceptual equivalent of shaping reality.

The other realities all exist, of course, without you, but you do not see, hear, feel or touch them. That is important.

So you have a moment of intuitive knowing and then you drive toward that reality (or drive against it if it is a warning or aversion signal) and you have shaped reality by knowing and doing or not doing.

That is so important that I cannot overstate its impact, Love.

⁷ <https://www.semanticscholar.org/paper/MICHEL-BOUNIAS-AND-HIS-ROLE-IN-DEVELOPING-A-DEEPER-Krasnolovets/10bfee6f79460e2e7901a96d8e731cbb8e077e1f>

Think about it.

And then think about how you freeze that knowingness as if we had nothing to do with any course of events, denying what you know and disrupting your ability to move smoothly and well throughout the entire reality web (I wanted to use the word “matrix” but that one is taken!)

It is a web, of course.”⁸

“...they are all bifurcated fractal levels and we step, as Michel taught us, from one plane to another, trailing clouds of glory as we come.” [General Bert 6.24.17]

Seeing and naming are the steps just before the opening of the Gate.

Energy to Open the Gate

The “Zero Point Fields contain all info-energy from forever, connecting us all together, per String Theory.” Kate Greene⁹

Nothing, whether Human Action or any Action in the Cosmos, occurs without the expenditure of Energy, wherefore we have the Universal Formula, $h\nu = mc^2$ (where $e = h\nu$) which points the way.

No amount of brute energy is sufficient to open a Gate. The failure of CERN to effectively do so proves that.

While the Bifurcations are infinite, the energy needed to step through a Gate from one to another is finite. It is comparable to the amount of matter-energy initially transiting the Gate to open it, which is just enough energy to produce an audible reproduction of the key Frequency.

Once Named the Gate has a defined location in this space-time where the discerning are able to *See* the Gate; that is where the expression of the Frequency is necessary to open the Gate. Intent is the Lock. Frequency is the Key. Consciousness is the Energy.

Preparing to Open the Gate

What remains is the key question: how does one build or find such a Gate in the hear-and-now of 3rd Millennium science and technology?

⁸ From *Living Comfortably in the 3rd Eye* – General Bert, posted at www.GeneralBertSpeaks.com

⁹ As stated by the Founding Chair of LifeSpirit Congregational Church: www.LifeSpirit.org

Some considerations:

1. The technology to be applied likely relies on the [alchemical?] marriage of Mind and Mechanism.
2. The Intentionally Imprinted Mechanism (IIM) relies on quantum state manipulation via Mind [Intent].
3. The IIM consists of a Receiving Module, a Memory Module and a Projection Module.
4. The Receiving Module receives the Intent; the Memory Module maintains that in Universal Consciousness (Akashic Record) and the Projection Module issues the appropriate Frequency.
5. The Gate opens to the intended Location.

Opening the Gate... in Process

Random Notes, subject to further research and consideration.

Receiving Module consists of a (Bind Rune marked) membrane that receives the expressed Intent through sound and light, transducing the expressed Intent to the Memory Module.

Memory Module consists of a pure quartz crystal which has been carefully cleared.

Projection Module consists of a concave *Feng Shui* Bagua mirror mounted behind the Memory Module.

General Bert's Healed World frequency:

548.888888888 (34.30555 17.152777[BWM] / Recip: 24.73)

Role of Quartz holding Intent (Consciousness with Frequency) . . .

<https://www.allcrystal.com/articles/do-crystals-vibrate>

https://en.wikipedia.org/wiki/Quartz_clock

Quartz Oscillator vibrates at 4096 H which is 16 H in a higher octave¹⁰, and also the 'FE' [Frequency Equivalent] of oxygen¹¹.

Conclusion

This is a draft LifeSpirit Essay. The suggested procedure to *Open the Gate* is experimental. It is subject to revision as the experiment continues.

Experimental Notes

Notes will be appended hereto as the experiment develops.
